To the Building Official,

B2 COMPLIANCE - JURALCO EDGE® BALUSTRADE SYSTEMS

at *Residential occupancy type A, A other, and C3*; at *any location in New Zealand that falls within the scope of this PS1* - see supporting PS1 report for scope

We have been asked to provide a PS1 for Clause B2 of the Building Code - Structural Durability

We are not able to provide this because there is no effective verification method for B2 contained within the New Zealand Building Code.

As these systems can be installed in a variety of settings, including internal and exposed environments, it is not deemed practical to specify durability requirements for the sub structure. Timber treatments, mild steel corrosion protection coatings, and concrete and masonry covers are therefore up to the building designer to specify in accordance with the relevant recognised standards.

However, we can confirm that for the structural elements shown in the attached documentation:

Material	Means of compliance	Details
Juralco Edge® Balustrade Systems - Aluminium and Stainless Steel	Alternative Solution	Stainless steel components conform to SS316. Aluminium extrusions, components, and hardware conform to 6060 T5. Non-structural cladding has a durability requirement not less than 50 years for this project. Note that the industry proven life of Aluminium, Stainless Steel, and Glass would satisfy a 50-year design life requirement. We note that this is on a time to first maintenance basis.
Connections - Stainless Steel fixings	Alternative Solution	All bolt and screw fixings within Juralco Edge® Balustrade Systems shall be minimum SS316. Non-structural fixings that are difficult to replace has a durability requirement not less than 50 years for this project. Note that the industry proven life of Stainless Steel would satisfy a 50-year design life requirement.

It is assumed that these structural elements are fixed to adequate structures by others.

Minor tea staining may occur in coastal environments. Refer to Juralco Edge® Balustrade Systems manual issue 10-24 v1 for the supplier's maintenance requirements.

Yours faithfully,

Managing Director
Kevin Brown
